Profile

Computer Science Graduate and an Innovative Front End Developer providing responsive User Interfaces to clients for over an year. Proficient in HTML, CSS, JavaScript, SQL and React technologies and adapted to find solutions to meet the clients expectations.

Work Experience

06/2022 – present
Pune, India

Software Developer BA3, Barclays

Develop ETL Processes to process data according to use cases using abinitio tools and linux.

- Implemented Complex SQL queries in abinitio tool.
- Used Jira for creating epic stories and keep track of work in the backlog.
- Used Java and python for pyspark technologies.
- Used linux for file management.

08/2021 – 06/2022
Gurugram, India

Associate Experience Technology L1, Publicis Sapient [🔗](#)

Design web applications using **React** framework according to client requirements and modify designs to meet clients specifications more efficiently.

Use debugging skills to check code, improve code base and enhance user experience and functionality of web applications.

- Processed Development of web applications using Agile project methodology.
- Used Jira for creating epic stories and keep track of work in the backlog.
- Used **React** frontend technologies to create UI and meet the clients expectations.

01/2021 – 07/2021
Gurugram, India

Junior Associate Technology, Publicis Sapient [🔗](#)

Learned prominent concepts of HTML, CSS, JavaScript and ReactJS.

- Gained hands-on experience with these technologies.
- Worked on hands-on project to learn professionalism.

Worked with senior developers and gained skills in aligning designs with client requirements.

Skills

HTML	<div><div></div><div></div><div></div><div></div><div></div></div>	CSS	<div><div></div><div></div><div></div><div></div><div></div></div>
JavaScript	<div><div></div><div></div><div></div><div></div><div></div></div>	ReactJS	<div><div></div><div></div><div></div><div></div><div></div></div>
Core Java	<div><div></div><div></div><div></div><div></div><div></div></div>	SQL	<div><div></div><div></div><div></div><div></div><div></div></div>
Ab Initio	<div><div></div><div></div><div></div><div></div><div></div></div>		

Projects

VIPPRO Portal

VIPPRO Portal is a portal used at Lowes. It is used by specific employees having higher authority to maintain the purchase data, store data and employee data.

- Created UI for 4 different pages of the applications including login page.
- Fixed 2 different external library issues to be used by all team members.

Technology Used: ReactJS, JIRA, Spinnaker, Jenkins

Version Control: GIT

Lowes RONA Header

RONA is a retailer of Lowes, their UI was divided in to 3 parts. **Header**, **Footer** and **Stores**. The Header was the topmost part where the store and cart information is displayed.

- Created Responsive header navigation bar components.
- Created functionalities like add to cart, view cart and language accessibility.

Technology Used: ReactJS, JIRA, Spinnaker, Jenkins

Version Control: GIT

Current Account Dormancy

Current account dormancy is a data processing project where we process the data and pick out the accounts that are inactive for more than 90 days so that those accounts can be blocked if not in use.

- Created 3 different abinitio graphs for processing data according to the queries given by business teams.
- Optimised the code which reduced the job run time by 2 hours and use less space in server.

Technology Used: Ab Initio, SQL, Linux.

Version Control: EME

Education

2016 – 2020 Chennai, India	B.TECH, Computer Science and Engineering, <i>SRM Institute of Science and Technology</i> ↗ Score: 73.29%
